What are Atopic Keloids?

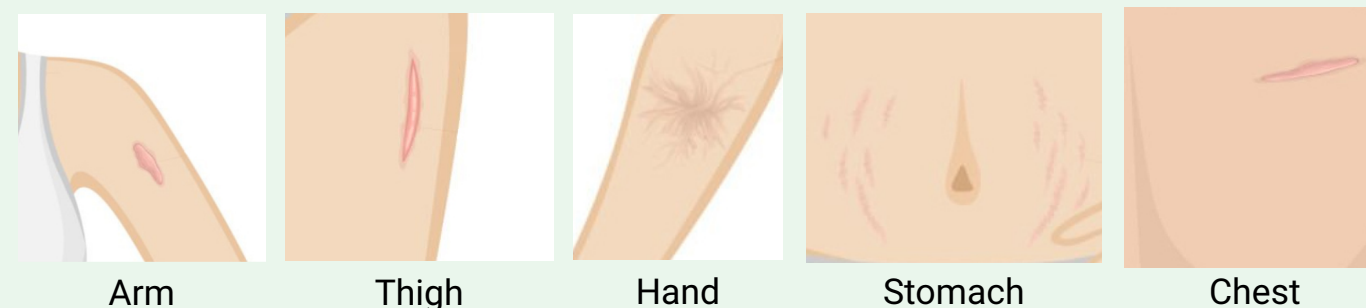

Atopic Keloids are raised overgrowths of scar tissue that occur at the site of a skin injury. They occur where trauma, surgery, blister, vaccinations, acne or body piercing have injured the skin. Less commonly, Atopic Keloids may form in places where the skin has not had a visible injury. Atopic Keloids differ from normal mature scars in composition and size. Some people are prone to Atopic Keloids formation and may develop them in several places.

Atopic Keloids are seen most commonly on the shoulders, upper back and chest, but they can occur anywhere. When a Atopic keloid is associated with a skin incision or injury, the Atopic keloid scar tissue continues to grow for a time after the original wound has closed, becoming larger and more visible until it reaches a final size. They generally occur between 10 and 30 years of age and affect both sexes equally, although they may be more common among young women with pierced ears. Atopic Keloids may form over the breastbone in people who have had open heart surgery.

DAY 10th

“Clinical data confirm improvements in thickened skin itching, and discoloration with an immediate effect.”

Atopic Keloids Complications

- On getting a flare up, it might cause more pain and itching and can finally end in contractures and restriction of movement in the affected spots.
- Complications are rare, but can arise.
- Medical Complications can occur when Atopic Keloid is present in certain places like bends and joints, or while talking treatments like steroidal injections or external irritant applications or suffering from diabetes, neurological disorders, etc.

Possible Complications

- Limited mobility: When the Atopic Keloid is extensive after burns or injuries, Atopic Keloids can limit the mobility of the body parts due to contractures of the skin and its tissues.
- Irritation from rubbing on clothing or other forms of friction to the Atopic Keloids.
- Discomfort, pain or tenderness of the Atopic Keloid.
- Psychological distress: In cases, where the Atopic Keloids are very large or disfiguring, they tend to affect the person emotionally.

KeloKind™

INTRODUCTION

KeloKind is a steroid-free topical cream designed for the effective management of atopic keloid scars. Formulated with clinically inspired ingredients, it helps improve the appearance of thick, irregular atopic keloid scars while soothing associated discomfort.

KeloKind works by softening and flattening raised scars, reducing redness and alleviating the uncomfortable burning sensation often experienced with atopic keloid formation.

This advanced formula also addresses skin lumps and swollen blood vessels, promoting a healthier skin texture over time. Unlike steroid-based treatments, KeloKind is safe for long-term use and does not cause skin thinning or other side effects commonly associated with corticosteroids.

With its powerful natural ingredients, Kelokind offers a safe and effective solution for individuals looking to manage stubborn atopic keloid scars.

our Ayurvedic Product, crafted with the goodness of Ayurveda and backed by AYUSH License No. L-326/Ayur

MAIN INGREDIENTS*

Kelokind™ Oil	Kelokind™ Cream
Cocos Nucifera Oil (Coconut) - Alleviates dryness and itching - Prevents secondary infections in damaged skin areas due to its antimicrobial properties	Argan oil - Moisturizes scar tissue and reduces inflammation - Support skin repair and improve elasticity

KeloKind™

Steroid free formulation

Kelokind offers an innovative, non-steroidal approach to managing atopic keloid scars, making it a safe and effective solution for those looking for a gentler treatment. Common atopic keloid scar treatments often rely on steroids, which can come with potential side effects like skin thinning and long-term dependency. Kelokind eliminates these concerns by offering a steroid-free formula, providing a more natural way to address scar tissue.

Kelokind works to soften and flatten raised scars, while soothing the skin and reducing redness. Its unique formulation promotes healthy skin regeneration and helps to restore a smooth, even texture, all while preserving the skin's natural integrity. By avoiding the potential risks of steroid use, Kelokind offers a reliable, sustainable way to manage atopic keloid scars, giving users the confidence of long-term results without the worry of side effects.

DIRECTIONS FOR USE:

Night Application:

Apply the cream to the affected area, gently spreading it evenly with your fingertip.

Morning Application:

Reapply the cream to the same area as applied the previous night. Wait 30 minutes before bathing.

Note:

It should only cover the affected area. Allow 30 minutes to dry before going to bed.

SAFETY CAUTION

- Conduct a patch test before full application.
- Keep out of reach of children.
- Do not use if irritation, redness, or itching occurs or consult the Doctor.
- Do not apply any other topical cream while using this cream.
- Store in a cool, dry place away from direct sunlight.

Warning: For external use only.

KeloKind™ Testimonials

"I've struggled with atopic keloid scars for years, and most treatments left my skin irritated. KeloKind has been a game-changer! Within weeks, my scars felt softer."

- Male / 34 years

"After using KeloKind for two months, my thick scars are noticeably flatter, and the discomfort has reduced significantly."

- Male / 27 years

"I tried everything from silicone gels to steroid creams, but nothing worked long-term. KeloKind's natural formula is soothing, and I no longer feel the tightness or itching I used to."

- Female / 29 years

Why choose us?

At Immunity bloom, we specialize in natural, steroid-free skincare solutions designed to enhance the lives of individuals with Atopic Keloid scars. Our products are 100% natural, safe for all skin types, and highly effective for various skin conditions.

Our team of specialist understands the complexities of Atopic Keloid scars and offers personalized treatments for the best results. Whether for skin, hair, or body concerns, we provide innovative care to help feel more confident in your skin.

Join the many who trust Immunity Bloom for their skin care needs. With professional recommendations and cutting-edge formulations, We offer the best in skin health for both men and women. Start your journey to healthier, more beautiful skin today.
